

It has come to my attention that Sinclair Broadcasting is forcing their stations to air an anti-Kerry documentary days before the election.

This is one of too many examples of the loss of our democracy through biased media conglomerates bombarding the public with their own biased perspectives.

Sinclair uses the public airwaves free of charge, and is obligated by law to serve the public interest not as a mouth piece for distortions for one side or the other.

Please enforce fair, unbiased reporting in the media and strengthen media ownership rules. The license renewal process needs to involve more than a returned postcard. Thank you.
